To promote a strong business and industrial climate for Chamber members through a partnership with businesses and the Miami County community.

New Format for the Newsletter

We're rolling out a new format for the newsletter that is easier to read and has more of the information you want. You will notice that each business has their own section. On the side of each business listing is all the pertinent information. We don't have complete information for every business so if you see your listing isn't complete, please email us at info@miamicochamber.com. Please use the list to the right as a template of what you can add.

You can also add coupons and logos. Just email us your logo and we'll be happy to include it. Email or call us with the text for your coupon.

I have a black leather coat that has mold on it, is it ruined?

Typical "black leather is really painted leather and we have real good success in cleaning them.

Doesn't every cleaner clean their own suede and leathers?

No. Leather and suede cleaning is NOT done like your suit or slacks are done. It requires special processes, training and experience. Several years ago, we got the necessary training and chemicals to clean leather and suedes and our cost to clean a typical suede or leather is about 1/2 what other cleaners charge (as they send them out to a leather cleaners).

I spilled some ice tea on my white rayon jacket. I forgot it about it and hung it up and took it out of the closet and it is all brown, why?

Just like when you take a bite out of an apple, the sugars present darken and this is what you are seeing. The longer it is on the garment, the more difficult to remove.
